## City of Eau Claire Health Chapter Issues Summary October 18, 2012 Meeting

What can we do to encourage families to do things together throughout the city?  Marketing of resources available such as trails/physical activity opportunities, trail maps, health care/nutrition.  Food/Nutrition  Encourage sustainable business development for food production such as  Farming (land/green house, hydro/aqua)  Value added (can/frozen)  Distribution  Study ways to provide businesses incentives/tax credits encouraging small independent businesses to subsidize healthy food vendors to increase access  Access to fast food is too easy  Too close to schools  #1 Wisconsin County Ranking in fast food density  Too many fast food places in general  Should we map the density of fast-rood establishments and regulate the density?  How can we start and promote farm-to-school food system programs?  Change ordinances that don't encourage urban agriculture (compost beds, chickens)  Not enough community garden space in neighborhoods and schools  Community composting sites  Few season-extension greenhouse options in the city  4 Chapter  What can the City do to address lack of fast healthy quality food?  Access to grocery stores in neighborhoods  Walkable/bike-able  Full service grocery downtown – needed  Convenience stores are unhealthy	<u>Issue</u>	<b>Dots</b>	<b>Staff Comment</b>
Provide signage for safe routes to school  Parks 5 yr. plans  Rould be signage for safe routes to school  What should the City do about public restroom availability or lack thereof?  Better utilization of the built environment for shared uses e.g. school playgrounds  Praks 5 yr. Plan  What can we do to Make existing parks more user-friendly (facilities & social interaction)  Parks 5 yr. Plan  What can we do to Make existing parks more user-friendly (facilities & social interaction)  Parks 5 yr. Plan  Should the City provide more opportunities for indoor exercise centers?  1 Staff question  Improve access to green space for physical activity needs to be in every neighborhood  Improve access to green space for physical activity needs to be in every neighborhood  What can we do to encourage families to do things together throughout the city?  O Marketing of resources available such as trails/physical activity opportunities, trail maps, health care/nutrition.  Food/Nutrition  Encourage sustainable business development for food production such as  Farming (land/green house, hydro/aqua)  Value added (can/frozen)  Distribution  Study ways to provide businesses incentives/tax credits encouraging small independent businesses to subsidize healthy food vendors to increase access  Access to fast food is too easy  Too close to schools  #1 Wisconsin County Ranking in fast food density  Too many fast food places in general  Should we map the density of fast-rood establishments and regulate the density?
